PRATHEEP RAJ S

Automation Test Engineer

Bengaluru, Karnataka | +91 63796 54491 | pratheep.te09@gmail.com | github.com/Pratheep-TE009

PROFESSIONAL SUMMARY

Automation Test Engineer with 3+ years of experience in web and API test automation, specializing in Playwright with JavaScript and Selenium WebDriver with Java. Designed a Playwright hybrid framework using POM, fixtures and config-driven parallel, cross-browser execution. Experienced in functional, regression, smoke, integration and end-to-end testing, API validation, Jenkins CI/CD, ReportPortal and HTML reporting, Jira, and Agile/Scrum.

TECHNICAL SKILLS

Languages: Java, JavaScript
Test Automation: Selenium WebDriver, Playwright, TestNG, Page Object Model (POM), PageFactory, Hybrid Framework, Data-Driven Testing (Excel, JSON, Apache POI)
API Testing: Postman, REST APIs, HTTP Methods, CRUD Operations, JSON Validation, Request Chaining
Reporting: ReportPortal, Playwright HTML Reporter
CI/CD & Build Tools: Jenkins, Maven
Version Control: Git, GitHub, Bitbucket
Defect Tracking: Jira
Testing Types: Functional, Smoke, Regression, Integration, System, Cross-Browser Testing; STLC; Test Case Design
Methodologies: Agile, Scrum
IDEs: Eclipse, IntelliJ IDEA, VS Code

PROFESSIONAL EXPERIENCE

Test Analyst | TestYentra Software Solutions Pvt Ltd **Aug 2026 – Present**
Client: Mediaocean | Application: Prisma | Domain: AdTech

- Maintain and enhance the Selenium WebDriver automation framework using Java, TestNG, Page Object Model (POM), and PageFactory.
- Develop and maintain automated test scripts and debug failures caused by application or framework changes.
- Analyze test execution results in ReportPortal and investigate failed test cases to identify root causes.
- Improve framework reusability, stability, and maintainability through script updates and framework enhancements.
- Manage source code using Git and Bitbucket, including feature branches, commits, pull requests, and synchronization with the shared repository.
- Collaborate with QA and development teams to investigate automation issues and support Agile/Scrum activities.

Test Engineer | Pentachrome Technologies Pvt Ltd **Apr 2025 – Jun 2026**
Application: Edible Arrangement | Domain: E-Commerce

- Developed end-to-end UI automation scripts in Playwright (JavaScript) covering critical user flows and regression scenarios.
- Built reusable page objects, fixtures and utility helpers for test data and common actions.
- Configured Playwright.config.js projects for Chromium, Firefox and WebKit, covering Chrome, Edge and Safari, with parallel execution and HTML reports.
- Implemented assertions using Playwright expect and used locators/XPath for precise element identification.
- Performed API testing with Postman (HTTP methods, CRUD, JSON validation, request chaining) and validated dynamic API responses using JSON Path.
- Converted manual test cases into automation scripts; applied STLC practices across functional, integration, and system testing.
- Tracked defects in Jira, participated in Agile/Scrum ceremonies, and pushed code to GitHub for CI test execution.
- Integrated the suite with Jenkins.

Test Engineer | Red Sky **May 2023 – Mar 2025**

Application: Prime HRM | Domain: Human Resource Management (HRM)

- Analyzed business requirements, prepared test scenarios and test cases, executed them, and validated application functionality against expected results.
- Performed Functional, Smoke, Sanity, Regression, and cross-browser testing to ensure a consistent user experience.
- Identified, reported, and tracked defects in Jira with severity and priority classification; retested fixes to verify application stability.
- Developed Selenium WebDriver (Java) automation scripts for core HRM workflows, handling dynamic web elements, dropdowns, alerts, frames, and synchronization.
- Implemented data-driven testing using Apache POI and external test data; used TestNG for assertions, annotations, grouping, and batch execution; integrated the framework with Maven and Jenkins.
- Performed API testing with Postman: validated CRUD operations, response bodies, status codes, headers, and JSON schemas, and executed end-to-end API workflows with request chaining.
- Participated in Agile sprint activities and collaborated with developers on defect resolution.
- Reduced manual regression effort through automation implementation.

PROJECTS

OrangeHRM Playwright Automation Framework | Personal Project

Tech: Playwright, JavaScript, Jenkins, GitHub

- Built a Playwright (JavaScript) test automation framework for the OrangeHRM application.
- Runs the test suite through Jenkins for CI; source code on GitHub (Pratheep-TE009).

EDUCATION

Bachelor of Engineering — Anna University, Tamil Nadu
